# Family Crypto Letter Template

Tell one trusted person WHERE things are. Never write the recovery words here.

Pre-filled example in gray. Cross it out and write your own on the line below each one.

### 1. Who this letter is for

*Example: My sister Dana Miller, phone in my contacts as "Dana M."*

### 2. What exists (no amounts needed)

*Example: One hardware wallet (small black device) and one exchange account.*

### 3. Where the device is

*Example: Fireproof box, hall closet, top shelf. Box key is on my car keyring.*

### 4. Where the recovery backup is (location only)

*Example: Sealed envelope in our bank safe-deposit box #214. NOT the words.*

### 5. Where the device PIN hint is

*Example: Ask my attorney, Pat Lee. Do not guess. 3 wrong tries can wipe it.*

### 6. Exchange account: how to start a claim

*Example: Contact the exchange support with my death certificate. Login email: on file with Pat.*

### 7. Who NOT to trust

*Example: Anyone who calls, DMs, or emails offering to "recover" it. Real help never asks for the words.*

### 8. When I last checked this letter

*Example: Reviewed 10/17/2026. Re-check every 6 months or after any change.*

**Golden rule: this letter says WHERE. It never holds the 12/24 words, a photo of them, or a PIN.**

Keep it offline (paper), tell one person it exists, and store it apart from the recovery backup.
